

# PIPELINE LUNCH MEETING

**Next generation research:  
continuing to create value  
through pioneering science**

**13:30 | 14:30    MARCH 10, 2021**

**SCIENTIFIC  
PROGRAM**

# PIPELINE LUNCH MEETING

## RATIONALE

At Biogen, we are PIONEERING SCIENCE that takes us deep into the body's nervous system, and stretches wide across digital networks and patient communities, to better understand the underlying qualities of our essential human nature.

Millions of people around the world are affected by neurological disorders, multiple sclerosis, Alzheimer's disease, Parkinson's disease, amyotrophic lateral sclerosis, spinal muscular atrophy and inherited retinal diseases.

We are advancing a robust pipeline in neurological disorders, the new frontier of science with significant unmet medical needs.

Please join us on Wednesday, March the 10th from 13:30 to 14:30 to attend our event ***"Next generation research: continuing to create value through pioneering science."***

13:30 | 14:30

## PROGRAM

Chairperson: Monica Di Luca | Director Department of Pharmacological and Biomolecular Sciences, University of Milan

Speaker: Alfred Sandrock | EVP, Head of Research & Development (Cambridge – USA)

### Opening

Monica Di Luca

### **Next generation research: continuing to create value through pioneering science.**
